

FIG. 2 (a)

FIG. 2 (b)

FIG. 3 (a)

Figure 1 is a line graph showing the number of photons (Y-axis, scaled by $\times 10^4$) versus Energy, keV (X-axis, ranging from 0 to 120). Two curves are plotted: a solid line for 100 keV and a dashed line for 120 keV. Both curves show a broad peak around 60-70 keV. The 120 keV curve has a much higher peak, reaching approximately 11×10^4 photons, while the 100 keV curve peaks at about 2×10^4 photons.
